

Project Name : Guru99 Banking												
Document Title: Test Case Sheet												
Author: Ukwajiuba Kelechi Solomon												
Testing Environment: Windows 10, Chrome												
Version : 1.2												
Test Type: Functional Testing												
Feature Name	Test Case_ID	Test Scenario	Pre-conditions	Test Data	Execution Steps	Expected Result	Actual Result	Status	Priority	Comment	Defect_id	Test Type
Software Accessibility	SM_001	Ensure that the software url is accessible	Get details of the software (url)	http://demo.guru99.com/V1/	1. Open a web browser 2. Enter the URL: http://demo.guru99.com/V1/ 3. Press Enter	The website should load successfully without errors	Displayed as expected	Pass	High			
MANAGER												
Name field (empty validation)	TC-01	Verify that the system displays an error message when the Name field is left empty while adding a new customer.	The manager should be logged in and be on the add new customer page	name : " "	1. Do not enter any data in the name field 2. Press tab and move to the next field	System should display error message: "Customer name cannot be empty"	The error message "Customer name cannot be empty" was displayed as expected	Pass	High			
Name field (invalid format validation)	TC_02	Verify the addition of a new customer with an invalid name format	manager should be logged in and be on the add new customer page	Invalid format: "john1234"	1. Enter an invalid format in the name field 2. Press tab and move to the next field	The system should display: "Numbers and special characters are not allowed in the Name field"	Validation message was displayed correctly	Pass	High			
Name field (valid format validation)	TC-03	Verify system accepts valid name input	manager should be logged in and be on the add new customer page	name = "john"	1. Enter valid format in the name field 2. Press tab and move to the next field	The system should accept valid alphabetic input without displaying an error message	Name accepted successfully without error	Pass	High			
Name field (leading/trailing space validation)	TC_04	Verify system handles leading/trailing spaces	manager should be logged in and be on the add new customer page	first character : " John "	1. Enter name with spaces in the name field 2. Press tab and move to the next field	The system should display: "First character cannot be a space"	System displayed incorrect validation message: "numbers not allowed" instead of handling leading/trailing spaces.	Fail	Low			
Date of birth field (empty validation)	TC-05	Verify the system displays an error message when Date of birth is empty	manager should be logged in and be on the add new customer page	date of birth field : " "	1. Enter valid data in the Name and Gender fields 2. Leave the Date of Birth field empty 3. Press Tab	An error message "Date of birth cannot be empty" should be displayed	No validation message was displayed when Date of Birth field was left empty.	Fail	High			

Date of birth field (valid format validation)	TC_06	Verify that the system accepts a valid date format in the Date of Birth field.	manager should be logged in and be on the add new customer page	valid format : "04/05/2003"	1. Enter valid data in the Name field 2. Select Gender 3. Enter a valid Date of Birth 4. Press Tab	No error message should be displayed. The data entered should be accepted by the date of birth field	No error message was displayed. The data input was accepted as expected.	Pass	High			
Address field (empty validation)	TC-07	Verify that the system displays an error message when the Address field is left empty	manager should be logged in and be on the add new customer page	Address field : " " (empty)	1. Enter valid data for name, gender and date of birth 2. Do not enter any data in the address field 3. Press tab and move to the next field	System should display: "Address cannot be empty"	No validation message was displayed for empty address field.	Fail	High			
Address field (valid format validation)	TC_08	Verify valid address is accepted by the system	manager should be logged in and be on the add new customer page	Valid Address format : "8 , smith street"	1. Enter the field for name, gender, date of birth and address 2. Press tab and move to the next field	System should accept valid address input without displaying an error message	The data input was accepted and no error message was displayed	Pass	High			
City field (empty validation)	TC_09	Verify error message when city field is empty	manager should be logged in and be on the add new customer page	city field : " "	1. Enter valid data for name, gender, date of birth and address 2. Leave the city field blank 3. Press tab and move to the next field	An error message: "City field cannot be empty" should be shown.	The error message "City field cannot be empty" was displayed	Pass	High			
City field (invalid format validation)	TC_10	Verify that the system rejects numeric and special character inputs in the City field	manager should be logged in and be on the add new customer page	city field : "1234 "	1. Enter valid data for name, gender, date of birth and address 2. Enter an invalid data format for the city field 3. Press tab and move to the next field	An error message should be displayed "Numbers and special characters are not allowed"	The error validation message: "Numbers or special characters are not allowed" was displayed	Pass	High			
City field (valid input validation)	TC_11	Verify that the system accepts valid city names.	manager should be logged in and be on the add new customer page	valid format : "Ikeja"	1. Enter valid data for name, gender, date of birth and address 2. Enter a valid data format for the city field 3. Press tab and move to the next field	The system should accept a valid city name.	The system accepted the inputs correctly.	Pass	High			
State field (empty field validation)	TC_12	Verify error message when state field is empty	manager should be logged in and be on the add new customer page	state field : " "	1. Enter valid data for name, gender, date of birth, address, and city 2. Do not enter any data in the state field, 3. Press tab and move to the next field	The system should display: "State field cannot be blank"	The error message "state field cannot be blank" was displayed.	Pass	High			

State field (invalid input validation)	TC_13	Verify that the system rejects invalid state inputs containing numbers or special characters.	manager should be logged in and be on the add new customer page	invalid input: "1234 or @13#"	1. Enter the field for name, gender, date of birth and address 2. Enter a valid data format for the city field 3. Enter an invalid data format in the state field 4. Press tab and move to the next field	An error message should be displayed: "Numbers or special characters not allowed"	The error message "numbers are not allowed or special characters are not allowed" was displayed.	Pass	High			
State field (leading/trailing space)	TC_14	Verify that the system rejects leading spaces in the State field.	manager should be logged in and be on the add new customer page	first character : " Lagos "	1. Enter valid data in Name, Gender, Date of Birth, Address, and City fields 2. Enter a value with leading spaces in the State field 3. Press Tab	The system should display: "First character cannot be a space"	Incorrect validation message displayed: "Numbers are not allowed" instead of space validation.	Fail	Low			
State field (valid input validation)	TC_15	Verify that the system accepts valid state names.	manager should be logged in and be on the add new customer page	Valid data : "Lagos"	1. Enter valid data for all required fields, including State 2. Press Tab	No error message should be displayed	No error message was displayed	Pass	High			
Pin Field (empty validation)	TC_16	Verify that the system displays an error when the PIN field is empty.	manager should be logged in and be on the add new customer page	Pin field : " "	1. Enter valid data for name, gender, date of birth, address, city and state 2. Do not enter any data for the PIN field 3. Press tab and move to the next field	An error message should be displayed: "Pin code must not be blank"	The error validation message was displayed as expected.	Pass	High			
Pin Field (special character validation)	TC_17	Verify that the system rejects PIN inputs containing special characters	manager should be logged in	invalid format : "12#@"	1. Log in as a manager. 2. Navigate to the new customer 3. Enter the field for name, gender, date of birth , address, city and state 4. Input special characters for the PIN field 5. Press tab and move to the next field	The system should display: "Special characters are not allowed"	The error validation message was displayed as expected.	Pass	High			
Pin Field (Alphanumeric validation)	TC_18	Verify that the system rejects PIN inputs containing letters.	manager should be logged in and be on the add new customer page	PIN: "1234pi"	1. Enter valid data for name, gender, date of birth, address, city and state 2. Enter numeric numbers and characters for the PIN field 3. Press tab and move to the next field	The system should display: "Characters are not allowed"	An error message was displayed: 'characters are not allowed'	Pass	High			
Pin Field (leading space validation)	TC_19	Verify that the system rejects PIN inputs with leading spaces.	manager should be logged in and be on the add new customer page	first character : " 190923 "	1. Enter valid data for name, gender, date of birth, address, city and state 2. Enter a blank space for first character for the PIN field 3. Press tab and move to the next field	An error message should be displayed "first character cannot be a space"	System did not validate leading space; no error message was displayed.	Fail	High			

Pin Field (length validation)	TC_20	Verify that the pin field accepts only six digits	manager should be logged in and be on the add new customer page	incomplete pin number : "240	1. Enter valid data for name, gender, date of birth, address, city and state 2. Try to input fewer than 6 digits for the PIN field 3. Press tab and move to the next field	The system should display: "PIN code must contain exactly 6 digits"	The error message "PIN code must contain exactly 6 digits" was displayed.	Pass	High			
Telephone Field (empty validation)	TC_21	Verify that the system does not allow an empty telephone field.	manager should be logged in and be on the add new customer page	Telephone field : " "	1. Enter valid data for name, gender, date of birth, address, city, state and pin 2. Do not enter any data for the telephone field 3. Press tab and move to the next field	The system should display: "Telephone number cannot be blank"	The error validation message was displayed as expected.	Pass	High			
Telephone Field (special characters validation)	TC_22	Verify that the system rejects telephone inputs containing special characters.	manager should be logged in and be on the add new customer page	invalid input : "123@#"	1. Enter valid data for name, gender, date of birth, address, city, state and PIN 2. Enter special characters for the telephone field 3. Press tab and move to the next field	An error message, "special characters are not allowed ", should be displayed	The error message "special characters are not allowed" was displayed.	Pass	High			
Telephone Field (Alphabet validation)	TC_23	Verify that the system rejects alphabetic input in the telephone field.	manager should be logged in and be on the add new customer page	invalid input : "wetangy"	1. Enter valid data for name, gender, date of birth, address, city, state and PIN 2. Enter characters for the telephone field 3. Press tab and move to the next field	An error message, "characters are not allowed " should be displayed	The error message " characters are not allowed" was displayed.	Pass	High			
Telephone field (leading space validation)	TC_24	Verify that the system rejects telephone numbers containing spaces.	manager should be logged in and be on the add new customer page	Telephone number : " 09023	1. Enter valid data for name, gender, date of birth, address, city, state and PIN 2. Enter a blank space for the first character in the telephone field 3. Press tab and move to the next field	System should display error message: "First character cannot be a space"	The system failed to validate leading space; no error message was displayed.	Fail	High			
Telephone field (internal space validation)	TC_25	Verify that the system rejects telephone numbers containing internal spaces	manager should be logged in and be on the add new customer page	invalid input : "091234 34562	1. Enter valid data in all required fields 2. Enter a telephone number containing spaces (e.g., "091234 34562") 3. Press Tab	The system should display: "Telephone number cannot contain spaces"	The system displayed incorrect generic error message instead of specific space validation message.	Fail	Low			
Telephone field (valid input validation)	TC_26	Verify that the system accepts valid numeric telephone numbers.	manager should be logged in and be on the add new customer page	valid input: "0902343649806"	1. Enter valid data for name, gender, date of birth, address, city, state and PIN 2. Enter a valid data format for the telephone field 3. Press tab and move to the next field	The system should not display an error message. The data should be accepted	No error message was displayed	Pass	High			

Email Field (empty validation)	TC_27	Verify the system shows an error when the email field is empty.	manager should be logged in and be on the add new customer page	E-mail: " "	1. Enter valid data for name, gender, date of birth, address, city, state and PIN 2. Enter a valid data format for the telephone field 3. do not enter any data for email field 4. Press tab and move to the next field	An error message, 'Email ID cannot be blank', should be displayed	The error message "Email ID cannot be blank" was displayed	Pass	High			
Email Field (invalid input validation)	TC_28	Verify that the system rejects invalid email formats.	manager should be logged in and be on the add new customer page	Email: "john@gmail.com"	1. Enter valid data for name, gender, date of birth, address, city, state and PIN 2. Enter a valid data format for the telephone field 3. Enter invalid data for the email field 4. Press tab and move to the next field	An error message, 'Email ID is not valid' should be displayed	The error message "Email ID is not valid" was displayed	Pass	High			
Email Field (leading / trailing space)	TC_29	Verify that the system rejects email input with leading spaces.	manager should be logged in and be on the add new customer page	Email: " john@gmail.com"	1. Enter valid data in all required fields up to Email 2. Enter an email address with leading spaces 3. Press Tab	The system should display: "First character cannot be a space"	The system failed to validate leading spaces in the email field; no error message was triggered.	Fail	High			
Email Field (valid input validation)	TC_30	Verify that the email field accepts a valid email ID format	manager should be logged in and be on the add new customer page	E-mail : "john@gmail.com"	1. Enter valid data for name, gender, date of birth, address, city, state and PIN 2. Enter a valid data format for the telephone field 3. Enter valid data for the email field 4. Press tab and move to the next field	No error message should be displayed. The data should be accepted	No error message was displayed	Pass	High			
Customer creation (end-end validation)	TC_31	Verify that a new customer account is successfully created when all required fields are filled with valid data.	manager should be logged in and be on the add new customer page	Valid input: "Name: John" Gender: "male" D.O.B: "09/01/2000" Address: "8, Smart Street" City: "Ikeja" State: "Lagos" PIN: "902134" Telephone: "0903678123456" Email : "john@gmail.com"	1. Enter valid data in all required fields 2. Click on the Submit button	System should display: "Customer added successfully"	The system returned error message: "System error - unable to process request" instead of successfully creating a customer.	Fail	High			

Project Name: Guru99 Banking			Testing Environment: Windows 10, Chrome					
Document Title : Bug_report sheet			Test Type: Functional Testing					
Author : Kelechi Ukwajiuba			Module: New Customer					
Bug ID	Test Case ID	Title	Steps To Reproduce	Expected Result	Actual Result	Severity	Priority	Status
BUG_001	TC-04	Incorrect validation message for Name field with leading spaces	1. Enter " John " in the Name field 2. Press Tab	The system should display: "First character cannot be a space"	System displays: "Numbers are not allowed"	Medium	Low	Open
BUG_002	TC-05	The Date of Birth field allows empty input	1. Enter a valid Name and Gender 2. Leave Date of Birth empty 3. Press Tab	The system should display: "Date of birth cannot be empty"	No validation message displayed	High	High	Open
BUG_003	TC-07	Address field allows empty input	1. Enter a valid Name, Gender, and Date of Birth 2. Leave the address empty 3. Press Tab	The system should display: "Address cannot be empty"	No validation message displayed	High	High	Open
BUG_004	TC-14	Incorrect validation message for State field with leading spaces	1. Enter " Lagos" in the State field 2. Press Tab	The system should display: "First character cannot be a space"	System displays: "Numbers are not allowed"	Medium	Low	Open
BUG_005	TC-19	PIN field does not validate leading spaces	1. Enter " 190923" in the PIN field 2. Press Tab	The system should display: "First character cannot be a space"	No validation message displayed	High	High	Open
BUG_006	TC-24	Telephone field does not validate leading spaces	1. Enter " 09023456712" in the Telephone field 2. Press Tab	The system should display: "First character cannot be a space"	No validation message displayed	High	High	Open
BUG_007	TC-25	Incorrect validation for telephone numbers with internal spaces	1. Enter "091234 34562" in the Telephone field 2. Press Tab	The system should display: "Telephone number cannot contain spaces"	System displays incorrect generic validation message	Medium	Low	Open
BUG_008	TC-29	Email field does not validate leading spaces	1. Enter " john@gmail.com" in the Email field 2. Press Tab	The system should display: "First character cannot be a space"	No validation message displayed	High	High	Open

BUG_009	TC-31	Customer creation fails with valid input	1. Enter valid data in all required fields 2. Click Submit	The system should display: "Customer added successfully"	System displays: "System error - unable to process request"	Critical	High	Open
